Attention Steve Durling

Thank you for your assistance with the Berrima Colliery Bridge painting project.

The team you put together with Scaffrite for the assembly, utilisation and disassembly of the scaffold system worked very well.

The process of equipment election, risk analysis and carrying out the work with no incidents occurring to either the employees, contractors or the environment is a credit to the whole team involved.

The use of the cantilevered type scaffolding from one side was an innovative solution to access an old bridge spanning 45m in length and 40metres above the Wingecarribee River. The painting and encapsulation also worked well and the end result will give the bridge structure surface protection for years.

Yours Faithfully
